

Omnia W Max

Omnia W Max

Diverse, Innovative, Reliable

Omnia W Max is not only a new key cutting machine.

Omnia W Max epitomizes Silca's entire experience in duplicating bit and double bit (male and female), pump, adaptable gorges keys, central and rear stop keys and keys with vertical cuts. Above-average performances and reliability make Omnia W Max the most complete solution for key cutters and specialists that duplicate these types of keys.

Omnia W Max

Omnia W Max is a professional key cutting machine to duplicate bit and double bit (male and female), pump, adaptable gorges keys, central and rear stop keys and keys with vertical cuts.

Omnia W Max has been designed and manufactured in conformity with CE mark European standards.

Speed and reliability

Omnia W Max will amaze you from the very beginning: you will immediately appreciate its smooth movements, its easily-manageable carriage and its overall user-friendliness. Thanks to a careful design of the working space and to the clamps with different offset, Omnia W Max ensures:

- Speed and precision in the clamping of any type of key* with no limits to the stem length.
- Complete and simultaneous view of both clamps and of the entire working area.
- Simple and comfortable access to the working area.

Exclusive innovations

Vertical cuts carriage, pull-out gauge, led lighting, radial motion clamps and much more.

Diversity

Wide range of keys that can be cut with standard equipment, varied and tested range of optional accessories available.

Silver chromed levers

*also long-stemmed keys for safes

User-friendly and comfortable

Design, structural components and every single detail you will come into contact with (handles and levers, buttons and surfaces) have been designed and tested to guarantee a feeling of comfort and lack of strain.

Precise and safe for the key cutter

Omnia W Max is not only user-friendly, but also safe. Safety devices included in the machine: see-through cover, automatic turning off of the machine through a microswitch while installing the key, wide view and access to working area ensuring high safety standards and reliability.

Neat and clean working area

The integrated accessories area on top of the machine is particularly wide and capacious, allowing you to easily place accessories and keys. The incorporated tool holder dedicated to female keys tailstocks (optional) guarantees quick identification and immediate finding of the right accessory. Swarf collection in the dedicated tray, conveniently located on the machine's side, is designed to ensure a clean working area.

1 Carbide cutter
2 Spring-loaded tracer point
3 Pull-out gauge

Handy training

Silca is always close to its partners. The QR Code attached to the machine's side enables you to watch useful tutorial videos directly on your smartphone, helping you out with maintenance operations and installation of optional accessories.
