

Silca Remote Car Key for VAG®

HU66R09

Flip blade

Silca is pleased to introduce a new reference for duplicating VAG® remote car keys: the perfect solution for replacing damaged or lost keys, or to have a duplicate in case of emergency.

What are the main features?

The Silca Remote Car Key for VAG® (Volkswagen®, Seat® and Škoda®) has a similar design as the original key and is supplied ready-to-programme with the PCB, transponder and flip blade included. It has three function buttons (lock, unlock and boot release) and can be used on the vehicle models listed below. The key can be programmed with a diagnostic device.

The key is packed individually in a plastic clamshell for easy identification and hook display.

CE The Silca Remote Car Key for VAG® has been produced in conformity with CE mark European standards.

Ricognising the original remote type

Type A

Type B

To be compatible with a wider range of models the HU66R09 can be set in two different ways depending on the type of the original remote supplied with the vehicle.

Type A: the remote has a single-piece key shell that cannot be separated and the led is positioned at the top.

Type B: the remote has a shell that can be split into 2 parts with the led positioned half way up.

Silca Remote Car Key for VAG®
