

# Swift

## **Swift**

Swift is the mechanical key cutting machine for dimple keys with flat cuts, laser keys with internal, external and double external cuts and, with optional accessories, also tubular keys and laser keys with narrow stems.

#### **Technical Data**

Power supply: 220V-230V / 50-60Hz

Cutter motor: single phase and speed

Cutting tools: HSS (high speed steel) with TiN

coating

Tool speed: 50Hz: 6000 rpm (+/- 10%),

Movements: on three axes via rods and bushings

Carriage runs: X axis: 24 mm, Y axis: 50 mm, Z vertical axis: 22 mm

Dimensions: Width: 260 mm, Depth: 285 mm, Height: 315 mm

Weight: 12 kg

# Swift

# The mechanical key cutting machine for dimple, laser and tubular keys

Swift is the mechanical key cutting machine for dimple, laser and tubular keys. Easy to use, lightweight and compact, but extremely versatile thanks to its various optional accessories, Swift means reliability, durability and quality cutting results.

#### Clamp optimized for the installation of a wide range of keys

With Swift you can easily clamp a wide range of dimple, laser and tubular keys. The installation of tubular keys is made simpler thanks to a positioning device and an aligning bar that facilitate the correct adjustment of the key heads. The jaws of the cutter side of the clamp can be easily substituted.

#### Precise calibration means quality key cutting

The machine is equipped with sprung tracer point and adjustment ring nut for the perfect calibration of dimple keys. This ensures quality

cutting results even when original keys are worn out.

#### Ergonomic and comfortable use

The levers and knobs of the machine are made of engineering plastics and, thanks to their ergonomic shape, guarantee comfortable grip and handling. The carriage shifting via rods and bushings is smooth and without plays for precise key cutting results.

#### Lightweight, resistant and durable

Swift is lightweight, compact and made of top-notch components. The cutters provided are TiN plated for

better wear resistance, while the motor has a longer life compared to most machines of the same category available on the market.

#### Practical accessories area

On the upper part of the machine there's a handy accessories compartment that makes it easy to reach the most frequently used tools.

#### Safe for the operator

The mains switch of the machine is thermal-magnetic, a security device that prevents that the cutter automatically turns on after an abrupt interruption and reactivation of the electric power.

# Standard accessories

- Dimple key cutting
- Tracer TE01
- Cutter FE01

- Laser key cutting
- Tracer TE04
- Cutter FE04

#### Optional accessories

- Tubular key cutting
- Tracer TE07
